

Definitions

Lawn Maintenance

The lawn is maintained at a height of 2-3" weekly. Lawn Maintenance is completed on the same day each week weather permitting. Lawn clippings are picked up and removed as needed providing a healthy lawn and neat appearance. Clippings are blown or swept off of all sidewalks and driveways. Lawn edges are trimmed on a weekly basis, or as needed to facilitate good looks.

Fertilization

Five step Fertilizer program and Weed Control are applied at optimal times and soil temperatures throughout the season. Fertilizer applications provide the correct amounts of nitrogen, phosphorus, and potash. The nutrients are applied in granular form to stimulate leaf growth, promote green color, and develop root systems. The first applications contain a pre-emergent for crabgrass prevention. Weed Control is applied in liquid form. Weeds are sprayed as needed and with each Fertilizer application.

Core Aeration

The lawn is Core Aerated to improve lawn grass rooting, reduce soil compaction, and enhance thatch breakdown.

Spring Clean-Up

The Spring Clean-Up includes the removal of all debris, accumulated leaves, and material at the beginning of the season as weather permits. All material will be removed from around buildings, landscape beds, lawn areas, driveways, and sidewalks, and hauled away.

Fall Clean-Up

This service includes the weekly maintenance of leaves on the lawn areas during the fall until the final Fall Clean-Up at the end of the season. The Fall Clean-Up includes the removal of all debris, accumulated leaves, and material from around buildings, landscape beds, lawn areas, driveways, and sidewalks. All material removed will be hauled away.

Weed Removal

Weed Removal eliminates existing weeds in all bed areas. This service is included in the weekly maintenance basis.

Mulch Installation

Premium hardwood mulch is delivered and installed once per season. Popular in color and smell, our mulch provides moisture retention, breaks down into fine humus. This break down amends soil around plants, shrubs, and trees. And prevents new weeds germination.

Bush and Hedge Trimming

All bush, hedge, evergreen, and tree material that can be pruned without climbing will be trimmed. Each plant is shaped to develop natural form and maintain a neat and orderly appearance. All debris and material is removed from the property.

Flower Bed Edging

Flower bed edges are edged once a month for a clean appearance.
